

Lechuza®

LECHUZA Planters

Brings plant dreams  
to life

*All planters include  
the original LECHUZA  
sub-irrigation system*

**Clever watering with LECHUZA**

- LECHUZA's original sub-irrigation system turns plant care into child's play.
- Never overwater your plants again
- Up to 12 weeks without the need for further watering

**The LECHUZA sub-irrigation system is always included with every planter in the TREND Collection**

**High-quality planters, made in Germany**

- Stylish design, robust surface
- Shatterproof
- UV-resistant
- Frostproof
- With integrated "rain overflow function" for use outdoors

# How do LECHUZA planters stand above the rest?

Attractive planters are a dime a dozen. But do they also meet your plant's needs? LECHUZA planters do:

## **The sub-irrigation system ensures superb plant growth**

LECHUZA turns plant care into child's play: Simply fill the water reservoir integrated in the bottom of the planter once. Then let LECHUZA tend to your plants for up to 12 weeks\*, without the need for further watering.

## **No waterlogging - even when used outdoors**

The original LECHUZA sub-irrigation system is suitable both for plants that have high water needs as well as for those that require significantly less water, such as succulents (cacti, yucca, etc.). Thanks to an overflow function integrated in the bottom of the planter, LECHUZA provides potted plants with the perfect amount of water – even when used outdoors. When the drain plug is removed, excess rainwater runs off, preventing plants from becoming waterlogged.

## **NEW: The LECHUZA All-in-One Sets**

Now every LECHUZA planter comes complete with the proven LECHUZA sub-irrigation system!

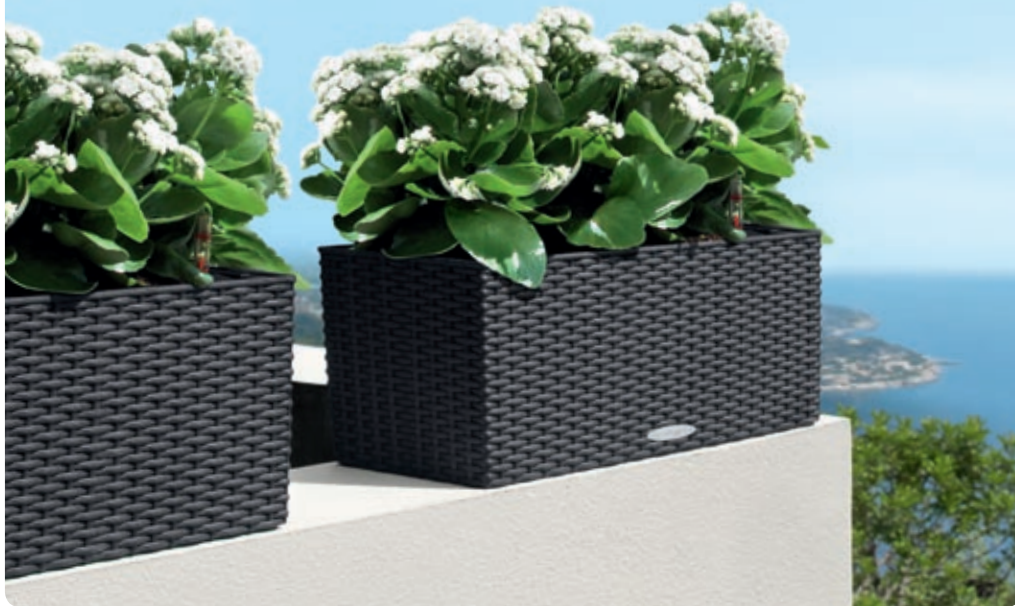

**New for 2010:**  
Now LECHUZA also offers a balcony box planter

\* depending on planter size, plant, and location.

BALCONERA creates the perfect setting even for unusual balcony plantings

BALCONERA Cottage 50 – Kalanchoe

BALCONERA Cottage 50 – Petunia-Hybriden, Pelargonium

BALCONERA Cottage 80 – Petunia, Matthiola, Heliotrop, Lavendula

## \* BALCONERA Cottage Brings balcony dreams to life

Conventional balcony boxes cannot compete with BALCONERA's 50 and 80 centimeter-wide planting area. BALCONERA has a number of additional advantages over other balcony boxes in its form and function. Thanks to the high-quality structured plastic design it is naturally robust and resistant to impact, wind and weather. The woven "Cottage" structure gives it Mediterranean flair and a lightness that perfectly complements all outdoor furniture. And now – complete with the LECHUZA sub-irrigation system included with every BALCONERA planter – it is a beautiful example of how caring for and attending to plants can be child's play.

- 1 A beautiful home for your plants with BALCONERA: Conventional balcony brackets are no longer visible from the front of the planter where they are attached (e.g. LECHUZA balcony box bracket, Art. No. 19020)
- 2 Add greenery to your balcony with ease: First plant the interchangeable plant liners on the ground, then set them into the pre-mounted planter effortlessly using the recessed carrying handles.

**Perfect anywhere:**  
The BALCONERA Cottage is attractive throughout the year whether placed on the balcony, in the winter garden or in the living room.

Tip for a stylish plant arrangement: CILINDRO Loft planters in a row

CILINDRO Loft 32 – Hydrangea

## \* CILINDRO Loft *Urban elegance*

The CILINDRO Loft is the perfect planter for those who insist on design flair in their everyday lives. The smart and stylish designer column from LECHUZA creates the perfect setting for your favorite plant. Thanks to the sub-irrigation system, this modern planter's alluring linear design and trendy colors will showcase your plant's lush foliage for a long time to come. Even when you're not at home: The LECHUZA sub-irrigation system lets your plants take care of themselves for up to 12 weeks.

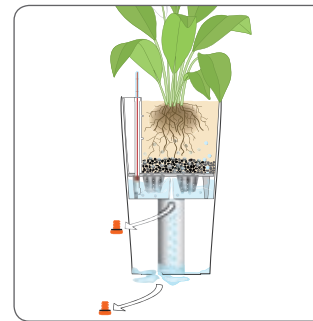

CILINDRO Loft 32 – Kalanchoe

CILINDRO Loft 23 – Phalaenopsis

CILINDRO Loft 23 – Crassula hobbit

Stylish design. Inside and out: Simply remove the drain plug in the plant liner and planter to allow excess rainwater to drain when used outdoors. The plants will continue to be supplied with water.

Interchangeable plant liners with recessed carrying handles: Do the planting somewhere else (or have a nursery or florist do this for you) and place the liner into the planter at the desired location without any mess. It's a great solution. From LECHUZA.

*Stylish design, robust surface – CUBICO Cottage is the perfect planter for the garden and patio.*

## \* CUBICO Cottage *Simply impressive and absolutely unbeatable.*

LECHUZA Cottage planters feature a woven design and a modern, country house style, are lightweight, UV resistant, frostproof, and weatherproof. With its durable and easy to clean surface finished in flattering earth tones, this planter line was made for virtually any outdoor use – on patios, balconies and more. A special overflow function allows excess rainwater to easily run off and the integrated plant liner makes changing the planting child's play.

LECHUZA Cottage is a true alternative to conventional terracotta planters, for example. In fact, the surface is so robust that the planter can withstand even the harshest weather conditions outdoors and yet it still entrances the onlooker with its astonishingly natural woven design.

CUBICO Cottage 30 – Sansevieria

CUBICO Cottage 30 – Ficus Bonsai

*Unbeatably stylish. Inside the home and in the winter garden, too.*

CUBICO Cottage 30 – Sansevieria

LECHUZA's trademark: Thanks to the interchangeable plant liners, redecorating in the summer or moving plants to the basement to store for the winter is child's play.

The CUBICO Cottage's robust, watertight surface structure is astonishingly natural.

CUBE Cottage 40 – Hibiscus sinensis

CUBE Cottage 40 – Buxus

CUBE Cottage 40 – Bougainvillea glabra

1

## \* CUBE Cottage

### *The simplicity of existence*

The CUBE Cottage's extraordinary design gives the impression of weightlessness despite its remarkable size and enormous planting depth. Together with its elegant, yet robust surface structure this mighty planter gracefully complements any surroundings. CUBE Cottage is both smart and practical: Even when planted, the optional coaster makes moving the planter from one place to another an easy feat on balconies and patios.

And thanks to the integrated plant liner, which also conveniently fits in the high CUBICO 40 column planters, you have nearly unlimited freedom in creative outdoor cultivation. What's more, you can easily relocate the plantings into other planters or move them to a warmer location for the winter. LECHUZA – because intelligent solutions make plant care even more fun.

2

- 1 Practical accessories: The coasters make CUBE Cottage planters mobile (also fits under CLASSICO 43!)
- 2 Every CUBE Cottage already includes the practical plant liner with overflow function.

CUBICO & CLASSICO Color is available in 4 attractive colors

CUBICO Color 40 – Trachycarpus fortune

## \* CUBICO & CLASSICO Color *Here come the colors*

LECHUZA adds color to your life. The Color line of the Trend Collection provides you with a full selection (of colors): attractive, trendy colors, two shape variants (round CLASSICO pots and high CUBICO columns), and a variety of sizes. LECHUZA is guaranteed to accent and add colorful style to your home decor with stylish planters and gorgeous, thriving plants, which are cared for just as nature intended thanks to the integrated sub-irrigation system. Fill the water reservoir every now and then (the integrated water level indicator reliably lets you know when) and enjoy your flourishing plants without the stress of watering.

CUBICO 40 coaster  
(fits Cottage and Color)

Interchangeable plant liner  
with CUBICO

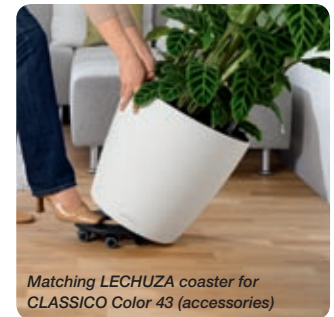

CUBICO Color 40 – Asplenium antiquum

CLASSICO Color 21 – Celosia Venezuela

CLASSICO Color 35 – Asplenium nidus

CLASSICO Color 43 (accessories)

# \* LECHUZA Trend Collection

## Selection of planters at a glance

LECHUZA brings fantasy to life when it comes to enjoying your plants to the fullest with less work and even more amazing results thanks to intelligent accessories and LECHUZA's sub-irrigation system. Why wait any longer? Choose your LECHUZA planter from our wide range of styles, surface structures and colors today!

### The original LECHUZA sub-irrigation system:

Cares for your plants just as nature intended.

- 1 Water level indicator**  
Ensures complete watering control.
- 2 Water supply shaft**  
Makes adding water and liquid fertilizer easy.
- 3 LECHUZA-PON as a separating layer**  
Perfectly controls the water supply to the plants.
- 4 Separator**  
Forms the water reservoir in the bottom of the planter.
- 5 Drain plug**  
Is removed to allow excess rainwater to drain when used outdoors. The water reservoir continues to provide your plants with water.

### The All-in-One concept!

Simply enjoy plants without the stress: Now all LECHUZA planters come with the matching sub-irrigation set, and BALCONERA, CUBICO, CUBE and CILINDRO models include an interchangeable plant liner with overflow function.
